

UNMASKING GLOBAL WARMING

The Culprits Behind Climate Change

Welcome to 'Unmasking Global Warming: The Culprits Behind Climate Change.' In this visually engaging exploration, we delve deep into the intricate web of factors driving our planet's rising temperatures.

Greenhouse Gas Emissions

Visual: Graph showing the increase in CO₂ and methane levels over time.

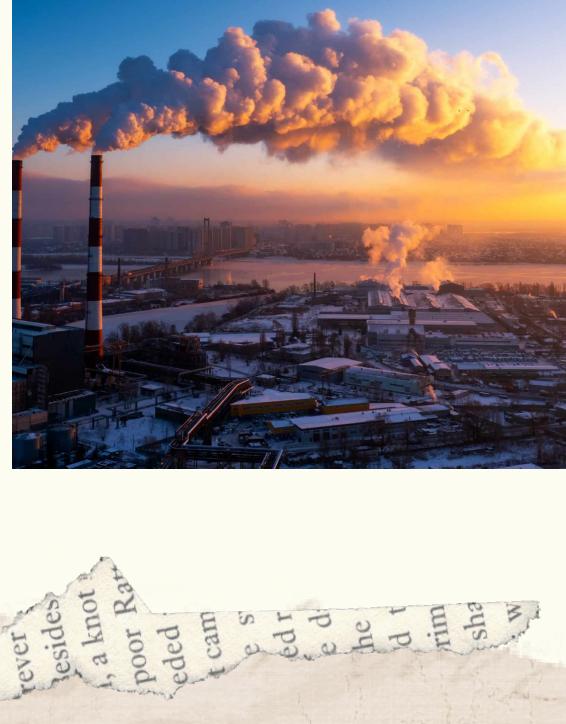

Content: Explanation of how human activities, like burning fossil fuels and deforestation, release greenhouse gases into the atmosphere.

Deforestation

Visual: Images of deforested areas before and after.

Content: Describe how deforestation contributes to global warming through reduced carbon absorption and increased emissions.

Industrial Processes

Visual: Icons representing factories and manufacturing.

Content: Explanation of how industrial activities release greenhouse gases and pollutants into the air.

Transportation

Visual: Icons representing cars, airplanes, and ships.

Content: Explain the role of transportation in emissions and the shift towards eco-friendly alternatives.
